Profile Summary

Enthusiastic and goal-driven Computer Science student passionate about Data Science and Artificial Intelligence. Skilled in Python, machine learning, deep learning, SQL, and data analysis. Completed certified training from HCL in data science, AI, and data presentation. Hands-on experience with real-world projects and internship exposure. Strong analytical skills, a quick learner, and eager to contribute to meaningful data-driven solutions.

Education

B.Tech in Computer Science
KNIPSS College, Sultanpur
Currently pursuing • Expected Graduation: 2026

Class 12
Completed in 2022 with 70%

Class 10
Completed in 2020 with 77%

Technical Skills

- Languages: Python, Java (Basic)
- Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
- Machine Learning: Regression, Classification, Clustering, Scikit-learn, TensorFlow, Keras
- Deep Learning: Neural Networks, CNNs, RNNs
- Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV, Streamlit
- Databases: SQL
- Tools & Platforms: Jupyter Notebook, Git & GitHub, VS Code, basic Linux
- Business Intelligence: Power BI – for interactive dashboards and data visualization

Internship

Cognifyz Technologies
Data Science Intern

Worked on data cleaning, exploratory data analysis, and building predictive models using ML libraries. Gained practical exposure to data-driven problem-solving.

Projects

-Designed an interactive sales dashboard in **Power BI** to visualize key ecommerce metrics including revenue, orders, profit trends, and customer segmentation. Enabled dynamic filtering and performance insights for business decisions.

🌐 Live: ecommerce sales dashboard

- Movie Recommender System: Built a content-based movie recommendation engine using similarity metrics in Python.
🌐 Live: click_here_link

- WhatsApp Chat Analyzer: Tool to analyze chat exports using Python for frequency analysis, visualizations, and activity reports.
🌐 Live: click_here_link

Certifications

- Data Science, AI & Data Presentation – HCL Training Program

Strengths & Extras

- Strong communication & presentation skills
- Eager to learn and adapt to new technologies
- Team player with logical thinking & problem-solving attitude
- Practicing coding on LeetCode & HackerRank
